Evolution is too slow

Gecko lizards are well known for their nanostructured toe pads that enable them to climb smooth and vertical surfaces. Give Mother Nature a couple of million years and she will come up with amazing things. Update 2012 is an event for companies and scientists looking for ideas and project partners that can speed things up.

Conference tracks

Surfaces – with a particular focus on new and enhanced properties, functional coatings and biosurfaces.

Life Science – where nanotechnology can be used in therapy, simplifying diagnostics and in-vivo measurements.

Production & Safety – an industrial perspective, with talks about nanotechnology for packaging materials, issues concerning the work environment and more.

Science to Business and Matchmaking – listen to inspiring talks, participate in the poster session and book face-to-face meetings with potential project partners.

Signing up

Update 2012 will be held at Dunkers kulturhus in Helsingborg, on 27-28 March. Participation is free of charge but registration is mandatory. Deadline for registration: 5 March 2012.
